

# Sixty days to a signed decision.

A structured evaluation of Verillian in your own environment, on your own infrastructure, under your own keys. No cost. No commitment.

Five seats, sixty days, free. The agent installs on your devices, intercepts the AI traffic you choose, and enforces the policy you set **before any content reaches a provider**. Every event is Ed25519 signed and SHA-256 hash-chained into a record your institution holds. **Verillian never receives your data.**

<p><b>Kickoff</b></p> <p>days 1–3 · agents installed, success criteria set in writing, first traffic flowing</p>	<p><b>Day 30</b></p> <p>structured check-in against the criteria, scope and terms discussed</p>	<p><b>Day 45</b></p> <p>review with evidence, conversion objections surfaced</p>	<p><b>Day 60</b></p> <p>a clear yes, no, or one-time extension for procurement</p>
--	---	--	--

## WHAT WE EVALUATE

- The agent installs cleanly on your machines and stays invisible to staff
- It intercepts the tools your teams actually use
- Policy is enforced at execution: ■ ALLOW ■ REDACT ■ BLOCK
- The signed chain renders and verifies against your framework
- Your security and compliance owners sign off

## WHAT EACH SIDE BRINGS

- **You:** a host for the admin service, an identity provider, a named technical contact and an executive sponsor
- **You hold:** your infrastructure, your backups, your encryption key
- **Verillian:** the software, a time-limited license key, onboarding, and working-session support throughout
- **Verillian holds:** none of your traffic, ever

## AFTER THE PILOT

Per seat, annual. **Starter \$180** (50–250) · **Standard \$150** (251–1,000) · **Enterprise \$120** (1,000+). Pilot success criteria carry directly into the production order.
